Universität Bern

WHAT IS AN AAI PORTAL?

- “Helper” for connecting non-AAI-enabled resources to AAI
- Unit between home organizations, AAI and resources
- Receives user attributes upon user request from home organizations
- Can collect additional user contributed information
- Can store user information
- Can host one to several courses

POSITION OF AAI PORTAL

- Architecture design almost finished
- Implementation of prototype almost finished

- Connection of the prototype with a VITELS test environment
- Transfer of project SWITCH
