The Swiss Education & Research Network

Outlook 2007

Thomas Lenggenhager
lenggenhager@switch.ch

- **Additional Resources**
 - **at Federation Members**
 - Any web server could become an AAI resource
 - Also exclusively internal applications can make sense to «shibbolize»
 - **at Federation Partners**
 - E-Journals
 - Services for students
 - ...

- **Additional Home Organizations**
 - Universities of applied sciences
 - Pädagogische Hochschulen / Hautes écoles pédagogiques
 - University hospitals
 - University libraries

SAML 2 & Shibboleth 2.0

- Today we use Shibboleth 1.3 with OpenSAML 1.1
- **SAML 2.0 was finalized in March 2005**
 - We use the SAML 2.0 metadata format with Shibboleth 1.3
 - OpenSAML 2 available, but not yet released: C++ & Java
- **Shibboleth 2.0 was expected in 2006**
now in late spring 2007...
 - To be fully interoperable with Shibboleth 1.3
 - Java SP in addition to the C++ SP
 - Attribute push will become the default for Shibboleth 2.0 SPs
 - SAML 2.0 Single Logout implementation
 - SWITCH will test Shibboleth 2.0, once beta versions get available

Shibboleth®

- It takes much longer than expected...

- **SWITCHslcs**

An example of what is possible today without modifications at the Shibboleth IdPs

- **Liberty Identity Web Services Framework**

- Liberty ID-WSF 2.0 specs released on 4. Oct 2006
- Shibboleth 2.1 expected to support profiles for web services and multi-tier use cases based on Liberty ID-WSF 2.0
